BOOSTER PACK

PRINTER GUIDE PROOF / DO NOT PRINT THIS PAGE

Exact geometry from the supplied Booster-Pack.pdf (QPMN small booster template)

BACK / QR

FRONT

BACK / ART

Cyan: trim. Blue: folds. Magenta: inner edge of the template heat-seal area.

Bleed canvas: 172 x 132 mm. Measured trim: 166.333 x 125.678 mm.

Central front panel: 70.000 mm wide. Flat canvas exports at 2032 x 1560 pixels / 300 DPI.

Important type stays inside the heat-seal edges. Rear content stays clear of the outer wings.

The rear preview joins equal half-panels; fin-seal folding and manufacture need the printer proof.

Use the clean PNG (or clean PDF if the uploader accepts it), at the template size. Do not fit to page.

Colour is RGB. Gold is flat #D4AF37. No metallic ink, foil mask or substrate finish is specified.

Approve the new layout and inspect a physical sample before placing a larger production run.
